

AUTHORS

DAN DASCĂLU

Member of the Romanian Academy,
Funding Director of IMT Bucharest,
Professor at UPB

GHEORGHE PASCOVICI

Ex-General Manager of the Institute of Atomic Physics,
Măgurele

MARIUS BĂZU

Ex-researcher at ICCE and IMT Bucharest

ANDREAS WILD

Ex-Director at Motorola SPS / Freescale Semiconductor,
Ex-Executive Director of ENIAC / ECSEL Joint Undertakings,
EU public-private partnerships in nanoelectronics

PETRU AL. DAN

Ex-Manager of the Power Semiconductor Devices Factory
at IPRS Băneasa / Băneasa SA
Ex-General Manager of AGA Gaz Romania and Ex-Operations
Manager for Europe South-East at Linde AG

OTHER CONTRIBUTORS

VIOREL BANU

CNM Barcelona

RADU BÂRSAN

Vicepresident Power Integrations Inc., USA

GHEORGHE BREZEANU

Professor at UPB

OCTAVIAN BUIU

INCD Microtehnologie, IMT Bucharest

CORNEL COBIANU

INCD Microtehnologie, IMT Bucharest

RADU COTEȚ

Ex-Head of Department at Université Catholique de Louvain

DOINA DIDIV

Ex-General Manager of IPRS Băneasa

DRAGOȘ DOBRESCU

Professor at UPB

TUDOR DUNCA

Ex-IPRS, O2 Micro-Romania, Catalyst, ON Semiconductor

VIRGIL GHEORGHIU

Ex-IPRS Băneasa, O2 Micro-Santa Clara USA

DANIEL LĂPĂDATU

Technical Manager of Alfa Rom Consulting SRL

ANCA MANOLESCU

Professor at UPB

AUREL MILLEA

Ex-General Manager of the National Institute of Metrology

ALEXANDRU MÜLLER

INCD Microtehnologie, IMT Bucharest

RALUCA MÜLLER

Scientific Manager of IMT Bucharest

EUGEN POPA

Ex-General Manager of IPRS Băneasa; General Manager
of Băneasa Silicon SRL

CORNEL STĂNESCU

ON Semiconductor

GHEORGHE ȘTEFAN

Corresponding member of the Romanian Academy,
Professor at UPB

ADRIAN VERON

Ex-IPRS Băneasa, IMT Bucharest

TRAIAN VIȘAN

R&D Manager of Infineon Technologies Romania

CONTENTS

AUTHORS AND OTHER CONTRIBUTORS	5
LIST OF ABBREVIATIONS	6
A NOTE FROM THE EDITORS OF THE ENGLISH EDITION	7
FOREWORD: ROMANIAN INVOLVEMENT IN HIGH TECHNOLOGY	15
1. INTRODUCTION	19
1.1. Domain Evolution: from Electronic Tubes to Nanoelectronics	19
1.2. Main Development Stages of Micro- and Nanoelectronics in Romania	26
2. SPECIALIZATION IN HIGHER EDUCATION, CLOSELY RELATED TO THE R&D	31
2.1. The Department of Electronic Devices, Circuits and Architectures from the “POLITEHNICA” University Bucharest	31
2.1.1. <i>The Founders</i>	31
2.1.2. <i>The Domain of Electronic Devices and Circuits</i>	32
2.1.3. <i>The Domain of Electronic Systems and Architectures</i>	33
2.2. Professor Mihai Drăgănescu – the Founder of Microelectronics in Romania	34
2.3. The Doctoral School of Electronics, Telecommunications, and Information Technology in Bucharest (SD-ETTI-B)	40
2.4. Research Groups (Semiconductor Microwave Devices etc.) Led by Prof. Dan Dascălu	44
2.5. Research Groups (Devices on Wide Band Gap Semiconductors and Others) Led by Prof. Gheorghe Brezeanu	56
2.6. Micro- and Nanotechnologies Laboratory	65
2.7. In Memoriam: Adrian Rusu, Andrei Silard	66
2.8. Addendum: Milestones of the Higher Education in Microelectronics in Cluj-Napoca	71
3. SILICON TECHNOLOGY: INDUSTRIAL RESEARCH AND DEVELOPMENT.....	73
3.1. Introduction	73
3.2. The First Semiconductor Company Established in Romania	74
3.2.1. <i>The Role of the Industrial Research</i>	74
3.2.2. <i>The Decision</i>	74
3.2.3. <i>Setup and Milestones</i>	76
3.2.4. <i>From Manufacturing to Science</i>	79
3.3. Section 2300: The Power Semiconductor Devices Factory	83
3.3.1. <i>Introduction</i>	83
3.3.2. <i>Historical Perspective</i>	84
3.3.3. <i>Challenges in Power Semiconductors</i>	87

3.3.4. <i>The Mesa Concept</i>	88
3.3.5. <i>The “Core Compromise”</i>	89
3.3.6. <i>The Guard Rings</i>	90
3.3.7. <i>Technologies and Products</i>	90
3.3.8. <i>People and Their Areas of Responsibility</i>	92
3.3.9. <i>Partners</i>	98
3.3.10. <i>Scientific Contributions</i>	99
3.3.11. <i>Epilogue</i>	99
3.3.12. <i>Acknowledgements and Notes about the Authors</i>	100
3.4. Section 2400: The Bipolar Integrated Circuits Factory	101
3.4.1. <i>Introduction: The Baseline Technology</i>	101
3.4.2. <i>Starting Integrated Circuits in Romania</i>	103
3.4.3. <i>Advancing the Silicon Processing Technology (Front End Manufacturing)</i> ...	107
3.4.4. <i>Advancing the Assembly and Test Technology (Back End Manufacturing)</i>	110
3.4.5. <i>Product Portfolio Expansion</i>	112
3.4.6. <i>Digital Integrated Circuits</i>	112
3.4.7. <i>General Purpose and Industrial Linear ICs</i>	114
3.4.8. <i>Radio and TV ICs</i>	116
3.4.9. <i>Conclusions and Evolution after 1989</i>	117
3.4.10. <i>Acknowledgements</i>	118
3.5. Section 2500: The Silicon Transistors and Small Signal Diodes Factory	119
3.5.1. <i>Introduction</i>	119
3.5.2. <i>A Brief History</i>	119
3.5.3. <i>People</i>	121
3.5.4. <i>Technology</i>	123
3.5.5. <i>Product Development</i>	129
3.5.6. <i>Acknowledgments</i>	136
3.6. Confessions of a Former General Manager of IPRS Băneasa – Interview with Doina Didiv	136
3.7. The Twilight of IPRS Băneasa	138
3.7.1. <i>December 1989</i>	138
3.7.2. <i>Băneasa SA</i>	138
3.7.3. <i>The Brain Drain</i>	140
3.7.4. <i>The Aborted Privatization</i>	140
3.7.5. <i>A Survivor</i>	141
3.8. What Happened Since	142
3.9. Biographical Notes	144
4. ROMANIAN RESEARCH ATTACKS NICHE AREAS AND PREPARES SPECIALISTS IN MICROELECTRONICS	151
4.1. Introduction	151
4.2. ICCE Leadership and Evolution	152
4.2.1. <i>The Stage CCPCE (1969–1974)</i>	152
4.2.2. <i>The Stage of Accelerated Development (1974–1989)</i>	152
4.2.3. <i>The Post-Revolution Stage (1990–1996)</i>	155

4.3. Relevant Figures in Different Stages	157
4.3.1. <i>The Stage CCPCE (1969–1974)</i>	157
4.3.2. <i>The Stage of Accelerated Development (1974–1989)</i>	159
4.3.3. <i>The Post-Revolution Stage</i>	162
4.4. The Main ICCE Research Teams and Their Evolution	162
4.4.1. <i>Technology</i>	163
4.4.2. <i>Discrete Devices</i>	164
4.4.3. <i>Integrated Circuits</i>	165
4.4.4. <i>Optoelectronics</i>	166
4.4.5. <i>Testing, Characterization and Reliability</i>	167
4.4.6. <i>Applications</i>	168
4.4.7. <i>Manufacturing Technological Equipment</i>	169
4.4.8. <i>Growing Silicon Monocrystals</i>	169
4.4.9. <i>Passive Components</i>	169
4.4.10. <i>Hybrid Circuits</i>	170
4.5. ICCE Experimental Infrastructure for Research, Services and Microproduction ...	170
4.5.1. <i>The Stage CCPCE</i>	170
4.5.2. <i>Stage of Accelerated Development</i>	170
4.5.3. <i>Stage Post-revolution</i>	172
4.6. National and International Collaboration Relationships	172
4.6.1. <i>Publications</i>	173
4.6.2. <i>The Annual Semiconductor Conference (CAS)</i>	174
4.7. Conclusions: the Role of ICCE in the Micro- and Nanoelectronics Development in Romania	178
4.8. Biographical Notes: Representative ICCE Personalities	178
 5. TECHNOLOGICAL DEVELOPMENT AND MANUFACTURING OF MOS MICROELECTRONIC COMPONENTS	187
5.1. Introduction	187
5.2. Microelectronica S.A., From Inception (1976) to the Peak (1990) – Interview With Radu Bârsan	188
5.3. Microelectronica S.A. and the Research Institute for Microtechnology	193
5.4. Working at Microelectronica – Interview with Cornel Cobianu (part 1)	194
5.5. Biographical Notes	198
 6. ROMANIAN RESEARCH FOCUSES ON MICROSYSTEMS	201
6.1. Over a Quarter of a Century of Micro- and Nanotechnologies in Romania (1993–2020)	201
6.1.1. <i>Microtechnologies as Microsystem Technologies and Their Global Evolution</i>	201
6.1.2. <i>The Topic of Micro-Nanotechnologies in National Research and Development Programs (1993–2014), in Correlation with the EU Research</i>	202

6.2. A Prospective Study Identifies Romania's Potential for Nanotechnologies and Other Key Enabling Technologies (KET)	205
6.2.1. <i>Substantial Funding, Unclear Priorities, Successful European Cooperation ...</i>	205
6.2.2. <i>Potential for Several KETs (Key Enabling Technologies)</i>	207
6.2.3. <i>Diaspora Contribution in Defining Priorities</i>	210
6.3. Establishment of IMT, Its Contribution to Developing the Domain	211
6.3.1. <i>Performing in Microsystems: The First UE Center of Excellence (2008) ...</i>	212
6.3.2. <i>The First Nanotechnologies Lab (1996) and Its Affiliation to the Romanian Academy (2002)</i>	219
6.3.3. <i>The First European Open Facility for Micro- and Nanofabrication (2009)</i>	226
6.3.4. <i>Multidisciplinary Education of the Researchers. Postdoctoral Studies in Micro- and Nanotechnologies (Including Excerpts from an Interview with Cornel Cobianu, Part 2)</i>	234
6.3.5. <i>Catalyzing the Interactions with the Industry</i>	237
6.4. Recent IMT Achievements, Its Human Potential, and Its Infrastructure	240
6.4.1. <i>Capabilities of the R&D Laboratories, Contributions Towards Intelligent Specialization Priorities</i>	240
6.4.2. <i>Exceptional Participation in European Programs, Best National Institute (2011)</i>	254
6.4.3. <i>CENASIC – a New Experimental Infrastructure and a Research Center Specialized on Carbon-Based Materials</i>	262
6.4.4. <i>TGE PLAT – a Platform Providing KETs Access to Industrial Companies</i>	267
6.5. The Involvement of the Romanian Academy in Establishing and Growing the Micro- and Nanotechnologies	270
6.5.1. <i>The Establishment of the Center for Microtechnology, CMT (1991)</i>	270
6.5.2. <i>National and International Visibility of the Micro- and Nanotechnologies</i>	272
6.5.3. <i>CAS Continues under the Aegis of the Romanian Academy</i>	273
6.5.4. <i>ADDENDUM: Electrical and Electronic Sensors in Iași</i>	278
7. ROMANIAN SCHOOL OF NUCLEAR ELECTRONICS	279
7.1. Introduction: Evolution of Nuclear Electronics	279
7.2. Nuclear Electronics in Romania, Short History	284
7.3. First NIM and CAMAC Modular Systems, Romanian Multichannel Analyzers	289
7.4. Control Systems for a Heavy Ion Post Accelerator	294
7.5. After 1990: A New Start Through Access to Major Multinational Cooperation, Especially CERN, FAIR-GSI	299
7.6. International Bilateral Collaborations	307
7.6.1. <i>International Collaboration IFIN-HH with the University of Cologne, Institute of Nuclear Physics (Germany)</i>	307
7.6.2. <i>Bilateral Collaboration with the GSI Detector Group for the Development of Ultra-fast Structures such as ASIC-FEE</i>	313
7.7. “Quo Vadis” Nuclear Electronics?	315
7.8. Biographical Notes	319

8. ROMANIA INTERACTS WITH THE WORLD THROUGH COMPANIES	325
8.1. ON Semiconductor Romania (Initially, Catalyst Romania / Essex). A Brief History	325
8.2. Alfa Rom Consulting – A Brief History	328
8.3. Honeywell Romania Research Lab	329
8.3.1. <i>Working at Honeywell Lab – Interview with Cornel Cobianu (Part 3)</i>	332
8.4. Infineon Technologies Romania	335
9. ROMANIAN SPECIALISTS IN DIASPORA	339
9.1. Introduction	339
9.2. Person of the Year 2017 in Microelectronics: Sorin Cristoloveanu	342
9.3. The Manager of the Public/Private Partnership in European Nanoelectronics: Andreas Wild	346
9.4. The Romanian “Veteran” Generation in Nanoelectronics	349
9.4.1. <i>Andrei Vladimirescu</i>	349
9.4.2. <i>Mircea V. Duşa</i>	352
9.4.3. <i>Radu Bârsan</i>	358
9.4.4. <i>Viorel Banu</i>	361
9.5. A New Generation Reaching Maturity: Nanoelectronics and Nanotechnology	366
9.5.1. <i>Sorin Voinigescu</i>	366
9.5.2. <i>Adrian Ionescu</i>	367
9.5.3. <i>Florin Udrea</i>	372
9.5.4. <i>Sorin Melinte</i>	375
9.5.5. <i>Daniel Lăpădatu</i>	377
9.6. In Memoriam: Andrei Mircea (1935–2011)	382
10. MICRO- AND NANOELECTRONICS IN ROMANIA FROM AN INTERNATIONAL PERSPECTIVE	391
10.1. Introduction: The Birth of the Semiconductor Industry	391
10.2. Electronics in the Soviet Union	392
10.3. Electronics and Micro-/Nanoelectronics in Romania until 1989	393
10.4. An Assessment of the Romanian Micro-/Nanoelectronics in 1989.....	396
10.5. Current Status of Romanian Electronics and Micro-/Nanoelectronics	398
10.6. Towards a Strategy in Micro-/Nanoelectronics in Romania	400
